GLIMPSES OF GOD.

Discourse of Dr. Talmage on the Divine Saviour.

He Raises High Expectations of Day When That Now But Dimly Seen Will Be Fully Revealed.

[Copyright, 1901, by Louis Klopsh, N.Y.]

In this discourse Dr. Talmage raises high expectations of the day when that now but dimly seen will be fully revealed. "Lo, these are parts of His ways. But how little a portion is heard of Him? But the thunder of His voice who can understand?"

The least understood being the universe is God. Balaam would be any attempt by painting or sculpture to represent "Him." Egyptian hieroglyphs tried to suggest Him by putting His figure in every open space, implying that God sees and rules, but how imperfect the suggestion! When we speak of Him, it is almost always in language figurative. It is "He" "the Ray" "the Ray from on High," or He is "High Tower" or "the Fountain of Living Waters." His splendor is so great that no man can see Him and live. Who can conceive of the millions assembled in Westminster abbey for the purpose of making a system of religious belief, they first of all wanted an answer to the question: "Who is he?" And one does not dare even take the answering of that under-vetting question. They finally concluded to give the task to the youngest man in the assembly, who happened to be George Eliot. He consented to undertake the task, and it was decided that they would first unite with him in prayer for Divine direction. He began his prayer by saying: "God, Thou art a spirit, infinite, eternal and unchangeable in His being, wisdom, power, justice, goodness and truth." That first sentence of Gillespie's prayer was unanimously adopted by the assembly as the definition of God. But, after all, it was only a partial success, and after everything that language can do when put to the utmost strain and all we can see of God in the natural world and realize of God in the spiritual world, we are forced to cry out with Job in his text: "Lo, these are parts of His ways. But how little a portion is heard of Him? But the thunder of His power who can understand?"

So all those who have put together systems of theology have discussed about the wisdom of God. Think of a nation which can know the wisdom of the beginning, the knowledge of the thirtieth century as well as the first century. We can guess what will happen if it is only a guess. Think of a nation which can know the past as well as the present and all the future. We can contrive and invent on a small scale, but think of a wisdom that could comprehend a verse, think of a nation that can comprehend all the facts, scenes and occurrences of all time to come as plainly before us, as though that had already transpired. How can such an all wise Being have built all the material universe into one world and swing it a glorious mass through immensity, but behind His wisdom in developing up the grandeur, magnificence, and immensity, while His splendor on all sides, diversity, amplitude, magnificence, and power? "Worlds Moving in complete order, shining compact, in perfect symmetry, in teleology on one hand and most exacting microscope on the other, discovering the plan of God not one imperfection. What but Divine wisdom could have planned a human race, and here started a new world like this, pouring waters to slake human thirst and giving souls capacity to brook such food and drink as we have? What but divine wisdom, with such sunlight and surrounding the world with such wonders that all the scientists of the ages have only begun to unravel them? Wisdom in magnificence in form, in beauty, in grandeur, and in modulus. A sense of a wisdom that was able to form without any suggestion or any model to work by the eye, in any hand, the foot, the ear, the nose, the tongue, the brain, Galen, the most celebrated of medical authors among the ancients, fell on his knees at the overwhelming wisdom of God in the constitution of the human body. He said: "I am not worthy of the honor of touching the hem of thy garment." All of the wisest of the wise of all ages, with the wisdom of the great thinkers of all time, have you considered the far superior wisdom which fashioned the brain for all those thoughts and emotions which have hit their intellects? But it is only the millionth part of that wisdom that has come to mortal apprehension. Close next to every discovery is a wonder which has not been discovered. We see upon one specimen among 10,000 specimens.

A tradition says that Abraham of the Old Testament was when he failed to find a place for his sacrifice, centrifugal forces caused each other? But what is natural law? It is only God's way of doing things. At every point in the universe, whether in the nations, may breathe in health, the frosts and the heats hindered from working universal demolition? Power, as lavish as to take the world as it is, as every little atom in Ceylon and Imao and Hawaii as though they were pebbles; power to weigh the "mountains in scales" and the "hills in balance."

"Tremble and melt, O Congress! To move a rock we must have lever and screw and great machinery, but God moves the world with nothing but a word; power to create worlds and universes, to make the stars, to observe them again and again, they have been seen red with flame, then pale, with ashes and then scattered.

We get some little idea of the divine power when we see it in the works of creation. The sun, the moon, the earth, the stars, the ocean, the land, the mountains, which has ground up wet mud of its rains are no larger than your thumb nail and you can hardly find a sufficiently large enough to remove it from your hand. The thunder of the sky, the wind, the roar of the waves, the sea which washes the shore, on which are only a few crumpling pillars left. Sodom and Gomorrah were destroyed in a moment, and the flood that not a fish can live in them. Babylon and Nineveh are so blotted out of existence that not one uninjured shaft of their ancient splendor remains, nothing but ruins, piles, and at Nineveh the antediluvian world was able to send to the postdiluvian world only itself with a very small passenger list. Dismayed, frantic, the people saw over the land, and then told the go back to their usual channels as rivers and lakes and oceans. An omnipotent command the waters obeyed, and the winds, and the omnipotent command sinking them into their appropriate places. By such rehersals we try to arouse our own sense of the grand omnipotence, and our reverence, and awe, and adoration is intensified, but after all we find ourselves at the foot of a mountain we cannot climb, hovering over a depth we cannot fathom, at the bottom of a chasm we cannot cross, the compass, and we feel like first going down on our knees, and then like falling flat upon our faces as we exclaim: "Lo, these are parts of His ways. But how little a portion is heard of Him? But the thunder of His power who can understand?"

So all those who have put together systems of theology have discussed about the wisdom of God. Think of a nation which can know the wisdom of the beginning, the knowledge of the thirtieth century as well as the first century. We can guess what will happen if it is only a guess. Think of a nation which can know the past as well as the present and all the future. The other author was the scientist who composed my text. I think He wrote it during a thunderstorm, for the chapter says much about the clouds and the lightning, the thunder and the earth under the reverberations. Witty writers sometimes deprecate the thunder, and say it is the lighter of the sky, and something else. The other author was the scientist who composed my text. The Lord disconsolate the Philistines at Ebenezer. Job pictures the warhorse as having a neck clothed with thunders. St. John, in an apocalyptic vision, again and again heard the thunder, and say it is the lighter of the sky, and something else. Friends stand around and enjoy the parting moments. The clock strikes and God breathes through the clouds to give emphasis. It was the thunder that shook Sinai when the law was given, and the people trembled. It was the thunder that gave the glories of the Son of Righteousness. That is what has changed the features of the old man—St. Louis Republic.

MILITARY DESPOTISM.

Ostensible Civil Government Resting Upon Unpopulated Islands for the Philippines.

Secretary Root, in an interview, sets forth clearly and briefly the fact that the president's recent order of authority in the Philippines is solely upon the military power. Secretary Root's interview, which may be copied in the official interpretation of the president's present policy in the Philippines, says:

"The Philippines the president has announced as a colony, of governing the islands under his power as commander-in-chief of the army, with a constant regard to the safety of the country, as well as to the welfare of civil representatives of his power. This is the case. No man has ever been appointed to rule over the islands, and the manner of this announcement is startling. The president relies upon his military power—his power, not the power of the civil government, to govern the islands, nor even the power of the civil government as enlarged by Justice Brown's decision—but upon "his" power as a military dictator. The poor makeshift of the Spurred amendment, whereby Congress attempted to limit the powers of the president, has been entirely overlooked.

Of course, all will be done with a constant regard for the rights of the people, and with the determination to diminish the use of military force, and to increase the employment of civil representatives of his power."

That goes without saying. George III., never intended to rely upon his military power to govern the islands, but for the "rights of the people" in the colonies, his idea also was, as far as possible, to increase the employment of civil representatives of his power."

He was compelled to rely upon his representative of his power until he was obliged to resort to the military. It was the same with Lincoln, who, in the case of the Habeas Corpus, and the military usurpation of the Ruman emperor, as soon as they had been conveniently assimilated a conquered nation, to give it some form of civil government, subject to the power and caprice of the Roman Emperor.

The McKinley attempt to subdivide reciprocity treaties of more than doubtful constitutionality for the protection of the foreigner, and to render them less effective, is far more from Americans than they are glad to get from foreigners will not work, and can satisfy the Dingley protectionists, who mean to fight to the death against reduction of duties in any degree or manner. It will not satisfy such republicans as Mr. Babcock, who will say that there are better devices of the enemy of sacred Dingley. Besides, they propose that like Lincoln, they will give the government a tariff, and content with the reciprocity mode of favoritism, because they know that manufacturers who can export their products and sell them at very low rates of their most formidable rivals do not need protection at all.

Have You Noticed

The amount of Huggies and Harness that E. E. Reeves & Co. have sold this Spring? If not just cast your eye around and see for yourself. We will surprise you, but if you will call and look at his stock of Huggies and Harness you will understand why it is so; they are up to date in everything in that line and sell them at the very lowest prices. Call and see us at Hickman.

E. E. REEVES & CO.

Mr. W. S. WHOLEY, Cashier of the First National Bank of Winterrest, Ia., in a recent letter gives some experience with the new Huggies and Harness which will be of value to other mechanics. He says: "I had a carpenter working for me who was obliged to stop work for several days because of fever and fits with diarrhea. I mentioned to him that I had been similarly troubled and that Chamberlain's Colic, Cholera and Other Remedies were the best. He bought a bottle of from the druggist here and informed me that one dose cured him, and he is again at his work. For sale by Cowgill & Cowgill, drugists."

E. E. Reeves want to give to each one of their customers, a Beautiful Hand Decorated China Dinner Set, free. Beware you get one.

R. W. BUCK'S CASE.

How He Was Prosecuted and Persecuted

WORK HOUSE, Muncie, June 17, '91.

Editor Courier:—

I know that you and several of my old friends will know that I am no thief. I may have been a drifter, but once we fought, and that took up my credit, and caused me to follow Jesus. I am a Christian and have done everything that I said I did in the name of Jesus. Since a boy I have had things, and always boasted that I hated in others, a thief and a liar. I am honest, God has given me strength to stand for him. They simply took a negro woman's word instead of mine. The people who have been here to see me do exist as laying on of the hands to cure the sick. You know the right there is and these people walking on the street dressed by myself in the perception of the worst sort. I ask the prayer of my friends that I may hold out until my trial. I am sorely tried and cast down, but I will bring me back and bleed my every effort. I certainly do lots of good here. I am poor. They come 5 miles here to see me and go to work them. A lady here that they tried to get her best to get her to prove me guilty. She is the reason that the doctor wanted to cut her thumb off, and I saved her life, as she came for me to see her after I got in jail. All good doctors love me but fakes. Oh, they do hate me and persecute. I have called several doctors and one swore to God that he would not let him live. I have the conscience of knowing it. God is with me. Pray for me.

Seven years in Bed.

Will wonders ever cease?" inquire the friends of Mrs. L. Pease, of Lawrenceburg. They knew she had been unable to leave home in seven years, as a result of kidney and liver trouble, nervous prostration and general debility; and when, in the course of her illness, she had to walk, the writers said, "In three months I felt like a new person." Women suffering from Heartburn, Backache, Neuralgia, Sciatica, Rheumatism, and Inflammation, find Duzzie's will help it. It is priceless blessing. Try it. Satisfaction is guaranteed. The following young men have enlisted for three years service in the U. S. Army with Sergeant Smith, charge of the 10th Inf'y, recruiting station, Andrew J. Guthrie, Thomas Thompson, Harry E. Patch, Samuel Sullivan, Connel E. Mooney, William H. Stevenson.

Kings Will Not Suppress.

It is said, a Dublin Dispatch that King Edward is very indignant over the recent statement of William O'Brien's Irish People.

The King says he is content to leave him in his place of command and has given explicit orders to prevent the further suppression of publications.

German American Paper.

Joseph Brucker, who for many years has been the managing editor of the Illinois State-Zeitung, left Chicago recently for Berlin, where he will establish a German-American journal of commerce under the name of Columbus. The new paper will be devoted to the interests of Americans, manufacturers and exporters who are seeking a large market in Germany.

Preston's.

"I would like to know," said the reporter, "if you are going to allow shirt-waist men to eat in your dining cars?" "We are," he replied, "the great railway magnate. I will leave it to you self if you think it time for grubbing when a man comes along with a dollar to hand over for a 40 cent dinner."—Indianapolis Press.

SCHOOL BOOK DECISION.

The Court of Appeals has decided that the school superintendent of a county, disengaging a violation of the contract, failed to pay the State of Kentucky to furnish school books at the same price charged by them in the fall amount of compensation and the money recovered is to go to the county school of the county.

School officials should look after these things and be certain that the school book companies comply with all the details in their contract.—Mayfield Messenger.

NEW AND GOOD RULING.

The supreme court has ruled that an entrepreneur may not charge twenty-four hours for a day's work.

It has been customary for judges to allow just an extra day's pay when they are out on a case. Under the ruling now made if they get their days pay, but then get another day's pay, they would get the same amount.

It is said that the same decision will allow only two dollars for an election day and night of twenty-four hours.

This is as it should be. Two dollars per day means 24 hours. Mayfield Messengers.

You may as well expect to run a steam engine with two men as to have an active man with four hours, and you may know that his liver is bad when he doesn't relish food or drink after a hard day's work, and sometimes die of an attack of rheumatism and sometimes die of a stroke of apoplexy.

POLITICAL POINTERS.

The committee on foreign relations ought to level headed, capable men who will not up set us instead of picking them,—"Albanus Arpa.

The more or less eminent gentlemen who are about to be nominated for the presidency in 1904 should be reminded that only a pretty smooth sort of a man would be permitted to stay in the nation.

There will be 476 members of the Boston Herald.

There will be an increase of 16 One good reason for this will be the fact that he has been removed from his former position as a political and thereby distributed the entire extension of the country more evenly over the country.—Worcester Spy.

A Terrible Explosion

"A gasoline stove burned a lady frightfully," writes N. E. Palmer of Kirkman, Ia. "The best doctors could not heal the running sores that followed the explosion, and she died a few days later." Insoluble for cuts, burns, boils, blisters, skin diseases and piles. 25c at Cowgill & Cowgill's.

TO ALL PERSONS HAVING FARMING, TIMBERED OR MINERAL LANDS, ETC. FOR SALE.

The Nashville, Chattanooga & St. Louis Railroad proposes to meet its best efforts in inducing the class of immigrants to settle in territory convenient to its lines, and to engage the attention of capitalist seeking Manufacturing Sites, Miners, Farmers, etc. It therefore solicits the support of the press in the assistance of the people of every county through which its road passes. The management has requested that all persons who have farms for sale, those who have timbered lands, water power or mineral lands for sale, will let the railroad agent nearest them give the prices and terms of sale. The prices and terms will be given to the agent of local buyers. The management does not propose to aid in selling land to immigrants at exorbitant or speculative prices.

The Heathen Chinese.

China should be exposed for being just a trifling skeptical about the promise that "salvation is free." Atlanta Journal.

The Chinese did not want the indemnity made quite so large, but what can a man do who is looking down the barrel of a gun?

It is estimated that 1,000,000 Chinese lives have been lost through starvation or violent death about Peking and the surrounding districts. This sort of estimate is scarcely likely to make the "foreign devils" any more popular among the natives of China.—Evening Herald.

A good tail storm story comes from New Mexico, under date of Wednesday, Aug. 1. A violent tail storm is reported from the mountains west of here this evening. It is said that the wagon road was covered with mudstones and wagons were buried. Must have been one of those wagons that you read about in fairy tales.

Mr. Bryan's suggestion that Justice Morton be under date of Wednesday, Aug. 1, to visit the scene of the mudstone, is a vain of sarcasm, has some merit. That Justice Bryan is a Republican with Democratic principles does not matter; the point is, even if he made the mudstone, the man, the great oration to that effect lies in the fact that more than a few, are needed in the supreme court.

Mr. Bryan will be under date of Wednesday, Aug. 1, to visit the scene of the mudstone.

Ladies should take off their hats in church says a cleric. No sermon can impress a woman who walks into a lopsided aggregation of dead heads straitened, cushioned skins, ribbon, bows, jets, sticks, straw, paper, flowers, corn cobs and thistle down. It makes a sinner feel lost in the wilderness.

In these days of cheap literature when the masterpieces of the great writers are sold for a song, it is interesting to note that the 1000 copies of the Countess of Anjou gave 20 sheep, one load of wheat, one load of rye and one load of millet for a volume of sermons written by a German monk.

Col. Minister to China in whose administration he served twelve years, is said to have a knowledge of the Chinese language and literature equalled by few persons in the world. He regards the higher sort of Chinese dialects almost as a native, and reads the language quite as well as he does English.

Major J. W. Thomas Prest, N. C. & St. Louis Railroad, and wife, Mrs. F. W. L. and Mrs. Ernest, will be Mr. and Mrs. George M. Alexander, of the State of Nashville, constituting a huge party, arrived in Hickman, Thursday, visiting Capt. H. A. Tyler, at his summer home.

Complaint arrangements have been made for the Good Roads State Convention to be held in Louisville, June 27 and 28. As Gov. Beauchamp, by proclamation, called the County Judges and Marshals to appear before him, every large attendance is expected. All the railroads within 200 miles of Louisville will give a one-half rate on the convention. The trip will be the least expensive. The conventions held elsewhere in the South have drawn large crowds, in addition to delegates, from all over the country.
